EXPERIENCE

Head of Data & Technology PWAN Premium Realtors & Concerns LTD

- 03/2025 - Present
- Developed 50+ dashboards and reporting views across sales performance, customer pipelines, agent activity, and operations for management and 20+ staff.
 - Automated daily, weekly, and monthly reporting, reducing manual spreadsheet work by 60-70%.
 - Built SQL- and Google Sheets-based reporting workflows with scheduled Apps Script updates, consistent data checks, and shared reporting standards.

Freelance Data Analyst | Reporting, Automation & Client Support Upwork & Fiverr

- 06/2022 - Present
- Delivered data cleaning, dashboard development, SQL analysis, and spreadsheet reporting for small businesses, startups, and research clients.
 - Combined and reconciled source records using pandas and rapidfuzz; developed reusable preparation and reporting workflows.

EDUCATION

B.Sc., Computer Science

March 2020 - January 2023

Computer Engineering coursework

February 2015 - March 2020

PROJECTS

UK E-commerce Analysis

- Analysed 500 sample records for sales trends, promotional periods, loyalty, and regional performance; reviewed CRM data quality and presented business recommendations.

Dashboard Showcase

- Built 12 dashboard examples across healthcare, education, retail, sales, marketing, and finance, combining KPIs, filters, trends, and operational comparisons.

Environmental Cleanup Analysis

- Prepared numerical fields, queried cleanup activity and state rankings, and visualised geographical contributions through maps and treemaps.

SUMMARY

Data Analyst experienced in SQL, Excel, Power BI, Tableau, Python, and R. Turns operational records into reliable reporting, business insights, and repeatable analytical workflows. Delivers stakeholder dashboards, data-quality improvements, statistical analysis, and automation for business and freelance clients.
